

PEOPLE I HAVE KNOWN

John H Lazarus

7th April 2017

Imperial Hotel, Llandudno.

During an academic career in endocrinology spanning 50 years I have been fortunate to be influenced by a wide variety of members of the medical profession as well as some basic scientists. The persons mentioned in this talk were not the only people who were influential in my career but perhaps were the main ones. To be included in the list they have to be deceased and, for the purpose of this presentation, medical or scientific. I have omitted several colleagues from continental Europe, USA and the rest of the world as these would not be of major interest to the audience of this society.
