

**Dr Margaret R Jones October 2022**

The History of the History of Medicine Society of Wales.  
Memorable Milestones.

The history of the History of Medicine of Wales founded in 1972 is a book yet to be written. This brief tribute highlights memorable milestones that occurred in the last 50 years enabling the Society to evolve as an important social and intellectual meeting place for Medical Practitioners, Specialists allied to Medicine and anyone interested in Medical History throughout Wales. Dr John Cule was the founding father of the Welsh Society and insisted it embraced worldwide history of medicine giving it the title of The History of Medicine Society of Wales – not The Welsh History of Medicine Society.
